

AUTHENTIC, VINTAGE & ANTIQUE HARDWARE & GOODS

MASTER PRODUCT BROCHURE
EDITION-08

— A GALLERY OF INSPIRATION —

Welcome to “The Cottingham Collection”

The Cottingham Collection range has been born out of a desire to create Authentic Hardware and Household goods.

What sets the range apart from other brands of ironmongery is the unique designs and finishes. Whilst the bulk of mass produced ironmongery on the market today is finished in black epoxy, lacquer or beeswax, the CC range is handfinished using traditional methods.

All cast iron products go through a 5 stage hand finishing process to achieve a natural authentic finish that will age naturally over time.

All our items are manufactured from original castings or copied from original designs completely unique to the CC range using traditional sand casting methods. We continually strive to create

and design products that will suit your property and still be beautiful for years to come, aging naturally over time.

We hope you enjoy the inspiration we believe this brochure will bring you and invite you to also visit the CC website www.cottinghamcollection.co.uk where the latest products & developments are listed.

GUIDE TO FINISHES

Please note all of our items are naturally finished (without any artificial coatings) and will age naturally over time.

ANTIQUE IRON (AI): INTERNAL USE ONLY

Our most popular finish by far. This exclusive finish has been perfected over many years. All cast iron items are traditionally sand casted. After this process all cast iron products go through a 5 stage hand finishing process to achieve a natural authentic, living finish which ages naturally over time. This beautiful finish can be easily maintained with a lightly oiled or waxed cloth.

SOLID POLISHED BRASS (SB): INTERNAL AND EXTERNAL USE

Traditionally sand casted our polished brass products are manufactured using the highest quality brass ore. After the casting process these are highly polished. The finish is left unlacquered so will age naturally over time, if you wish to keep the polished finish, simply polish the brass item with a polish such as Brasso.

ANTIQUE BRASS (AB) INTERNAL AND EXTERNAL USE

Traditionally sand casted our solid brass items naturally have a highly polished finish. To create an Antique brass finish, we speed up the aging finish using a natural aging fluid making the item look 100 years old in only a few days. This item requires very little maintenance, however to remove dirt and grime, these can be cleaned with an oily cloth.

CHROME ON BRASS (CPB): INTERNAL AND EXTERNAL USE

The ultimate Chrome finish. Polished brass is the perfect material to highly polish allowing a perfect chrome plating to be applied. This item requires very little maintenance, however to remove dirt and grime, these can be cleaned with a cotton polishing cloth.

CHROME ON IRON (CHC): INTERNAL USE ONLY

Traditionally sand casted using high quality iron ore. After the casting process is complete, the cast iron is polished revealing a slightly pitted surface. A chrome plating is then applied revealing slight imperfections. The vintage chrome finish is truly unique and will add charm.

BLACK BEESWAX (HFB): INTERNAL USE ONLY

Black Beeswax is a durable hardwax finish, primarily used to finish our hand forged items. This finish will age naturally over time. Little maintenance is required; however, you may wish to buff up with a waxy cloth to retain the patina.

SATIN BLACK (SEB): INTERNAL OR EXTERNAL USE

Our Satin black finish is hand applied onto our cast iron finishes then baked in an oven to create a durable antique black finish that can be used both internally and externally. This item requires very little maintenance, however to remove dirt and grime, these can be cleaned with an oily cloth

A photograph showing five metal hooks, numbered 1 through 5, arranged on a light-colored wooden surface. A wooden ruler is placed below the hooks for scale. The hooks are dark-colored and have a Y-shaped base with two curved arms ending in rounded tips. Hook 1 is on the left, hook 2 is in the center, and hook 3 is on the right. Hook 4 is positioned above hook 2, and hook 5 is positioned above hook 3. A large, stylized letter 'C' is visible in the top left corner of the image.

“I'd have to say that the Cottingham Collection products are hardwearing, stylish & great value for money”. Having purchased a Grade 2 listed Merchants House and shops that....READ MORE on the website.

A large, antique, cylindrical metal safe or strongbox. The safe has a heavy, rounded lid with a small handle on top. The body is made of dark, weathered metal with visible rust and patina. A decorative, ornate handle is attached to the side. The safe sits on a small, fluted base. The background is a wooden wall with various metal fixtures.

Where to buy your CC Products

The Cottingham Collection range of products is available online or from selected distributors of ironmongery who like us, are passionate about offering products of distinction to home owners and furniture manufacturers.

The products are held in stock at our UK warehouse and distributed in bulk to dealers who retail the products online or through their own stores or trade shops.

For details on your nearest distributor, please contact us and we would be happy to assist. Alternatively, you can order via the Cottingham Collection online store and we will dispatch within 2-3 working days or contact you should there be any need to advise a longer lead time.

Please subscribe for email updates on the website to ensure you keep up to date with the latest product developments from Cottingham Collection and ensure you share your ideas and completed projects with us on sales@cottinghamcollection.co.uk or on our Houzz website portfolio.

We look forward to hearing from you!
